## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, drawn to a lamination product, classified in class 428, subclass 40.1.
  - II. Claims 9-15, drawn to a method of making the product, classified in class 156, subclass 245+.
  - III. Claims 15-19, drawn to a method of laminating a photograph or other document in a lamination product, classified in class 156, subclass 292.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as providing adhesive on a portion of the release liner laminate and covering it with the web.
3. Inventions Group I and Group III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different

process of using that product (MPEP § 806.05(h)). In the instant case the product can be used to in a materially different process such as providing protection for a coin.

4. Inventions Group II and Group III are related as method of making the product and method of using the product. In the instant case the product used can be made by a materially different process such as providing the adhesive on a portion of the release liner laminate and covering it with the web, and then inserting a photograph.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Laura Wanek on April 27, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
